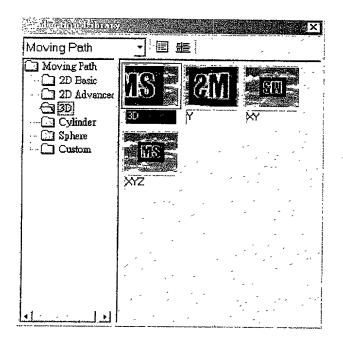

FIG. 2A (PRIOR ART)

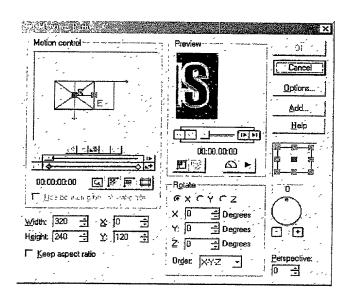

FIG. 2B (PRIOR ART)

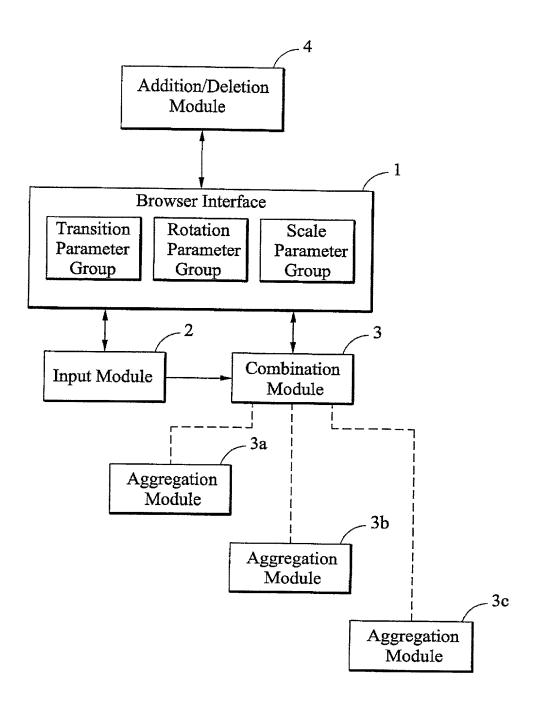

FIG. 3

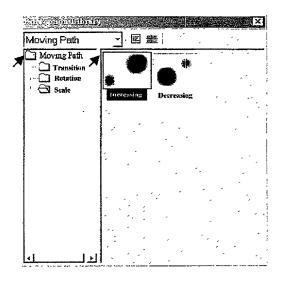

FIG. 4A

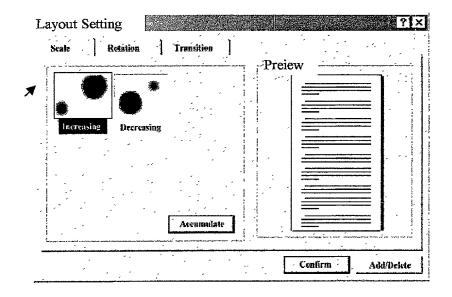

FIG.4B

Providing a browser interface, including a transition parameter group, a rotation parameter group, and a scale parameter group, wherein the parameter groups further respectively have a plurality of transition settings, a plurality of rotation settings, and a plurality of scale settings.

S3

S1

Selecting a transition setting, a rotation setting, and a scale setting from the transition parameter group, the rotation parameter group, and the scale parameter group based on the input of a user.

S5

Combining the selected settings into a moving path and completely imitating the moving path to the selected multimedia object.
